Making coffee with the Senseo Quadrante HD7865/60 from Eb en Vloed 7

1	You need - Cushion holder - Coffee powder - Senseo coffee maker - Cup	
2	Remove the water tank from the Senseo.	
3	Check whether there is sufficient water in the reservoir. The water level should be above MIN. If there is not enough water in the reservoir, refill it under the tap,	
4	Place the reservoir back in the Senseo.	

5	Put a coffee pad in the pad holder. Make sure that the label is on top.	
6	Lift the lid of the appliance.	
7	Place the holder with the pad in the Senseo.	
8	Close the lid of the Senseo.	
9	Place a cup directly under the spout	

10	Switch on the Senseo by pressing the power button.	
11	Wait until the power button stops flashing and then press the single cup button.	
12	The coffee starts to run. When the power button stops flashing again, your coffee is ready.	
13	Switch off the Senseo by pressing the power button and throw away the used pad.
